Wedding Gown Care - Tip 1, What to do when selecting a Wedding Gown.

Check the serviceability of sequins, beads, crystals and other decorative trims.

Glued on trim will never hold up as well as trim that is sewed on.

Check the sewing of trim work. Make sure it is carefully executed so beads don't start dropping off as the bride marches down the aisle.

Make sure there is a care label sewn into the dress, and avoid labels that say "spot clean" or "dry clean exclusive of ornamentation".
